## CITIZENS

### BUILDING and LOAN ASSOCIATION. Knoxville, Tenn.

#### \$25,000 TO LOAN ON CITY PROPERTY

Those desiring a profitable investment, should examine the merits of the

### CITIZENS.

The undersigned will be glad to give all desired information.

R. A. Chiles & Brown Cornelison,

LOCAL AGENTS.

George W. Betts, of Lancaster, charged with embezzlement of money of the Adams Express Company has been discharged.

Peter F. Meyer, who is in partnership with Richard Croker in the real estate business, has offered \$900,000 for Jerome Park racing property.

Jules Francois Camille Perry, the celebrated French statesman, died of heart disease Friday. At the time of his death he was President of the Senate.

Postmaster General Bissel has repeated the announcement that no one who held a post-office under President Cleveland's first Administration will be reappointed where there is another applicant for the office.

Hon. James P. Gay and Col. J. H. Holloway, of Clark county, aspirants for the State Senate from this Senatorial district, were in the city Monday getting acquainted with the people, each giving reasons why he should represent them.

Rufus H. Vansant of Elliott who was appointed as a member of the State Board of equalization by Gov. Brown has declined to accept, since his office of Master Commissioner of Elliott is worth more to him than the former office. The Governor has appointed L. C. Pritchard of Elliott in Mr. Vansant's place.

A few weeks ago a young man by the name of J. W. Hudson, hailing from Greensburg county, was united in marriage to Miss Bettie Perry, a beautiful young lady of Carrollton, Ky. The mother of the bride has just sworn out a warrant against the groom charging him with bigamy, and he now languishes in jail in default of bail.

Captain L. C. Kash, of White Hall, Madison county, was in the city yesterday. The Captain was born a staunch Democrat, has lived one, and will die in the harness. If there is one thing he loves more than another, it is his first and only love, the Democratic party; and if there is anything that gives him 'most sincere pleasure, it is in dealing a blow at his ancient enemy, the Republican party. We would like to see our friend, the captain, rake in some office under this administration.

Ex-Governor Buckner it has been stated, is preparing to answer the recent letter of Governor Brown. The matter has been clearly stated to the people and it will require a process at law for the matter in question, namely the business transaction between the State and Mason, Ford & Co., to be settled. These representative gentlemen have each had their turn and the people will be satisfied if they can only get their rights. This they demand, nothing more, and our dignified leaders can come to a rest.

A telegram went out Saturday from Morehead to the Louisville Times which indicated a misunderstanding between Judge John E. Cooper circuit court Judge and C. W. Nesbitt commonwealth's attorney in regard to the adjournment of the Rowan county grand jury. The report made it appear that Mr. Nesbitt had ordered the grand jury to adjourn by order of the Judge and that the Judge denied the truth of such an order and that a new grand jury was summoned and ordered to finish up business. Judge Cooper was seen here Monday and says there is no misunderstanding between him and Mr. Nesbitt and that the report in the main is inaccurate.

## REPUBLICANS

### Would Have Antagonism Between the President and the Senate.

#### Editors and Others of the Press Have an Opportunity in Common with Others for the Positions.

#### Business Men for Managers.

Senator Gorman, who was chairman of the caucus committee that made the Senate committee assignments, and therefore in a position to know whereof he speaks, said, I am reliably informed, to a personal friend: "There has been a lot of nonsense talked and printed about the positions upon the prominent Senate committees having been purposely arranged by the caucus committee so as to be antagonistic to the President. There is absolutely no foundation for any such statements. The assignments of the old Senators were made according to the well-known precedent which have governed such assignments ever since I have been a member of the Senate, and for many years before, and of the new ones according to the best judgment of the committee." Although Senator Gorman did not intend his remarks for publication, it is but justice to him and the members of the committee that they should be made public. This caucus committee had no authority to say that this or that Democratic Senator should not have committee positions to which they were entitled by seniority, because of their views upon this or that question, and had it attempted such a thing, its work would have been repudiated by the caucus which had to approve its report before it went into effect. It is only in Republican papers that there is any antagonism between President Cleveland and the Democratic Senators. No administration ever assumed office with a more harmonious party at its back than the present, and neither the President nor any prominent Democrat in Congress expects or sees any indication of anything to disturb the present pleasant relations between the President and the party, in and out of Congress. Statements to the contrary, if run down, will be found in every case to have originated either with a Republican or a journalistic sensation monger.

Certainly no one can raise and reasonable objection to the rule made by President Cleveland that no person should be sent as United States consul to an important commercial place who is not a thorough business man. It will not be necessary to go outside the Democratic party to find capable business men to fill every consular position maintained by the Government.

Democrats should be extremely careful about accepting as true statements concerning the intentions of President Cleveland which appear in Republican papers. A little consideration will convince them of the improbability of Republican editors and correspondents being taken into the confidence of Mr. Cleveland. A case in point was the spurious broadcast by Republican correspondents, a few days ago, of the positive statements that Mr. Cleveland had said that Democratic editors need not apply for office as he had made up his mind not to appoint them. Now, Mr. Cleveland never said any such thing, and the nearest approach to a foundation the

story had was the President's peculiar remark to a Congressman that editors must take their chances with other applicants. In order to impress the falsity of this statement upon Democrats Mr. Cleveland took special care that the first nomination of a postmaster sent to the Senate by him should be that of a Democratic editor—Mr. Robert B. Brown, of Meadville, Pennsylvania.

If there has been any doubt of the wisdom of sending a commission to Hawaii, which has been done by the Administration, it would have been dissipated by the talk of the Hawaiian Commissioners after they learned that a commission would be sent to make an investigation. It is evident that they fear the result of that investigation; consequently the suspicion which has existed for sometime in the minds of a few people, that the whole business has been conducted upon a one-sided basis, is increasing very rapidly. Honest and straightforward people never object to the most rigid investigation of their acts. It is always the other fellow who draws himself up and asks "Do you mean to cast aspersions upon my honor, sir?" President Cleveland only wants what the people want, about this Hawaiian business—the whole truth, and nothing but the truth—and ex-Congressman Blount is just the man to get it.

The best evidence of the confidence of the business men of the country in the Democratic Administration is furnished by the steady increase of gold in the Treasury, which began with the swearing in of the Democratic officials, and has continued right along ever since.

Now that the crowd left here by the inauguration has almost entirely gone, the President and the members of his Cabinet will have more time to devote to their official duties, and the result will be a large number of appointments in the very near future. As soon as all of the Assistant Secretaries in the various departments are nominated and confirmed, the applicants for position under them will have a chance to get their claims considered. It is expected that the Commissioner of Pensions will be appointed before the first of April, as it is known that Mr. Cleveland is particularly anxious for a speedy change in that office.

#### A Couple of Court-Day Fights.

Joseph Martin and Will Hardin, who live in this county, near the Bourbon line, became involved in a difficulty in A. H. Fletcher & Co.'s saloon yesterday about noon, over the settlement of an account. Martin cut Hardin pretty severely in the arm. Martin was arrested and his trial set for this morning. Hardin had his wound dressed and was not much hindered from moving about except for the loss of blood.

Robert L. Ware, of Clay City, yesterday shot a negro tough, Tom Greenwade, three times, one shot going through the arm, a second making a slight wound in the side and the third entering the hip. Ware claims the negro was one of three who sometimes robbed him in this city. The difficulty seems to have grown out of this. The shooting took place on Locust street near the Monarch Mills, just as a crowd was going to the 1 o'clock train, and for a time caused considerable excitement. Ware was held in \$500 bond and his trial set for to-morrow.

Mr. Dan A. Mossman, a large coal dealer, and one of the leading business men of Huntington, W. Va., was in the city this past week, making his annual contract for the famous Davy's Run coal, mined by the Strait Creek Coal Co., of which Judge Cassidy is President.

The Carnegie Steel Company has ordered a new press for its armor plate works at Homestead—an enormous piece of machinery that will cost over \$1,000,000—from Whitworth & Co., of Manchester, Eng. It will be the largest piece of machinery of the kind in this country, and perhaps in the world. The press will have a capacity of 19,000 tons.

## MRS. MINNIE ALBRO CASSITY.

Died, on Thursday morning, at 12:30 o'clock, Mrs. Minnie Albro Cassity, wife of S. S. Cassity, editor of the Sentinel-Democrat. Mrs. Cassity had not yet reached her twenty-seventh year, and had been a wife for but little more than five years. A gifted woman to whom God had given a much more than ordinarily bright mind she was enabled to write many beautiful and helpful things.

The story of her life and falling asleep the sorrowing husband has so well told, that we copy it from his papers.

#### It is Finished.

Her poor, tired soul has gone to rest. Her death was peaceful as the sleep of childish innocence. Her resignation to the will of God was complete and across her bright hopes—may, her full assurance of life eternal, there flitted no shadow of doubting.

My dear wife, Minnie Albro Cassity—the best friend I had on earth—died Thursday morning, March 16, 1893, after more than five months of prostration and suffering, at the residence of Rev. A. J. Arrick on Queen street, where she was carried Monday by loving hands to escape the terrible fire on Harrison Avenue which wrecked our residence.

She was born August 16, 1868, in Montgomery county, and was the eldest daughter of Geo. C. and Hattie (Albro) Smith. We were married Oct. 18, 1887, and we have three bright sweet children to scatter sunshine upon the cheerless waste which was once our happy home. They were born as follows: Alice Albro, Jan. 1st, 1889. John Leroy, July 5th, 1890. Harriet Lenore, March 1st, 1893.

The latter little angel never knew its mother and was, scarcely known by her; yet I pray God to give me grace, strength and wisdom to rear these children, and to so live myself that we all may be re-united, a happy family on the shadowless shores of that land "beyond the taking, losing and leaving."

As wife, mother and friend she lovingly discharged every duty. She was never very strong, physically, poor girl! but her mind, rich with the spoils choice literature and useful knowledge, was ever active and to me it was the guidepost to nobler thoughts, the lamp that shone for me upon the path of high resolves and more exalted memory. Oh, God, may her sweet memory ever linger about me and mine as our guard and guide in every act and thought—our solace in every time of trouble.

It seems to me that it came in the nature of a Providence after all, for her to be removed to the home of that good man and woman, Mr. and Mrs. A. J. Arrick. Frequently, during several hours before her death she asked Brother Arrick to pray God that her death should be easy. This he did, and that prayer was answered. She died without a struggle, and in my arms as she had often requested, while Brother Arrick sang "Jesus Lover of My Soul." She frequently asked Bro. Arrick to sing for her, and her request was cheerfully granted. Her favorite song began "The mistakes of my life have been many."

Only a short time before dissolution took place, she said in slow and measured tones: "WHAT LIFE IS TO THE LIVING, DEATH IS TO THE DEAD." I had heard her before in the still watches of the night when there was no one present except our God and myself, say the same thing. If it is a quotation from any book I have never read it.

But all has been said that need be said. Desolation surrounds the hearthstone of our once happy home. The greater light has gone

## WE HANDLE

The Oliver Chilled Plow and all repairs for it.

## WE HANDLE

The Keystone Disc Harrow, which has double lever and works as well on hill side as on level ground.

## WE HANDLE

The Malta Double Shovel, at a price that an inferior plow will cost.

## WE HANDLE

A full line of Doubletrees, Single-trees, Harrow Teeth, Plow Plates, Laplinks, Laplinks and etc.

## WE HANDLE

The Leader Cook Stove, which is acknowledged as good as any made.

**CALL AND SEE US.**  
We will sell you the best at the best prices.

## W. P. OLDHAM & CO.

out. Dr. Taulbee and that most excellent young lady, Miss Belle Hamilton, the nurse, did all in their power to lengthen the brittle thread. They came to our home not only in the role of their profession, but they came as brother—sister—friend. I have no language to express my deep sense of gratitude to them, and many other kind friends.

Yes the light has gone out, but Oh, God let the light of thy love and grace shine in our sad hearts instead, and help us to meet her younder.

S. S. CASSITY.

On Friday afternoon friendly hands tenderly bore her remains to the First Presbyterian Church, where Rev. A. J. Arrick conducted the funeral service, in course of which he paid a glowing tribute to the beautiful life just gone out. All that was mortal of her was laid to rest in Machpelah Cemetery.

#### The Greatest of All College Events.

The 6th annual contest of the Inter-Collegiate Oratorical Association will be held in the Opera House at Lexington, Ky., on the evening of April 7th. This contest has always been the crowning event of the year among our Kentucky Colleges; and since the faculty of Kentucky University has allowed the students of that institution to enter the contest, interest has continued to increase, and in the cities where the different colleges are located (Lexington, Georgetown, Danville and Richmond) excitement is unusually high and the friends of the different representatives are enthusiastic for "their man." The contest this year will be under the auspices of Central University.

The Opera House on Short Street, the largest suitable auditorium in Lexington has been engaged; and although the contest is several weeks off, the rush for seats is so great, that we predict that many of the friends of the contestants will be unable to secure seats and witness the battle. The program for this year will be Kentucky University first, Georgetown College second, Centre College third and the last coveted place will be occupied by Mr. Coleman O. Groves, of Central University. Mr. Groves has the "rep" over the other contestants, in that he is an experienced college orator.

Although he is the youngest of the competitors he has spoken on many an oratorical contest and often, after the judges have pronounced him the winner, has been carried off the rostrum upon the shoulders of his numerous friends and "backers."

In the catalogue of Southern college orators he ranks very high, having defeated men who have won Interstate and State inter-collegiate medals, and in the contest next month he will be an almost universal favorite with those who "keep up" with Kentucky oratorical contests and college honors. Mr. Groves is the son of Mr. John E. Groves, Superintendent of Public In-

struction of Montgomery county. Quite a crowd of admiring friends from Mr. Sterling expect to go down to hear him proclaimed "champion." Richmond will simply be moved off the map—the people will all go to Lexington and drag the town after them.

#### A Card of Thanks.

We are very grateful to those who so kindly aided us in saving our picture in the fire of last week, that destroyed our home.

Mr. and Mrs. J. A. Orsac.

#### A Card of Thanks.

We remember with feelings of gratitude the kind friends who so faithfully and unselfishly did all in their power to bring us in the fire that burned our home nor do we forget those friends who have done so many kind things for us since.

Mr. and Mrs. Enoch Bruton.

#### Ladies Columbian Club.

A meeting of the ladies of the Columbian Club, of Mt. Sterling, is called to meet at the Court House this afternoon at 3 o'clock. A full attendance is desired. Business of importance is to be transacted. Let no member miss the meeting.

A number of ministers and prohibitionists met at Pittsburg Thursday, launched a new political reform party. The platform recognizes God, demands equal rights, without regard to color or sex, suppression of the liquor traffic and all other evils.

Hayseed—A Minister Cleveland, I see the post-office in my town in Edinburg county, Kentucky, last time you run the thing and I'm here to get you again."

Cleveland—"Can't get it." Hayseed—"For why kain't I?" Cleveland—"Because a man has held office once can't do so again."

Hayseed—"Then why in the don't you practice what yer preach?" "What you doin' here?"—Louisville Times.

#### Bascom's Fight for Collector.

A strong fight is being made for the appointment of Hon. A. W. Bascom of Owensville, who wants to be Collector of Internal Revenue of the Southern district, and if he succeeds the entire programme heretofore mapped out for Kentucky internal revenue appointments will be changed. The fight that is being waged Mr. Bascom's friends is a vigorous and bids fair to be successful. Representative Brookridge has a card for Collector for the Southern district, the person of Mr. Shelby, who is Brookridge's law partner's fact. The struggle between the two candidates is now on in earnest, with Bascom as favorite.—Washington Cor. Lon. Post.

# THE ADVOCATE.

## Agricultural Notes.

Sheep like hay with brine on it.

The lambs to be fattened should be castrated.

It is hard to fatten sheep unless kept quiet and warm.

Grass growing is really a part of the business of cattle growing.

In the first place have a first-class animal, then give first-class care.

The value of the peach crop of the country is estimated at \$76,000,000.

Sheep will pay in instalments two or more times a year for their keeping.

Hogs do not pay for "at as profitably after a weight of 200 pounds is reached.

Around Montreal it is a common practice to sprout potatoes for early planting.

The Black Lima is a black, mottled-seeded pole bean, for which big claims are made.

Arrangements should be made to give the lambs and pigs good care when they come.

Lice and green worms may be killed by spraying young plants with kerosene emulsion.

When the variety shows on apple trees are less than twelve inches long, fertilizers are needed.

Grape vines can be pruned on any day when the weather is warm enough to work out doors.

Bone dust and and potash worked in liberally about the roots of peach trees are considered very valuable.

It is estimated that the ravages of insects costs the fruit growers of the United States \$400,000,000 a year.

A report of big losses of cattle on open ranges in Montana is not true says the Montana Husbandman.

In no case in experiments conducted by Prof. Goff has the removal of the seed end of potatoes shown advantage in yield.

Plant fruit trees in the poultry yard. The trees are needed for shade, and the ground had as well be utilized for shrub as not.

Cider kept in a cool place and well aerated or bunged so as to exclude the outside will keep very much longer than when exposed.

An exchange says that a good hog does not squeal, but eats his food quietly, lies down to sleep and converts it into fat.

The Iris is a hardy perennial plant that blooms during June and July. There are many varieties which will afford many colors.

There is too little attention paid to raising pumpkins. They are too good a food for man and beast, and are easily raised to be neglected.

Regulations have been made governing the inspection of Canadian cattle, by which the same may be exhibited at the Columbian Exposition.

Monthly roses belong for the most part to that class known as the roses, and their free flowering qualities make the most popular of all roses.

It is the man who raises and sells in inferior quality of fruit that gets the market. A fine quality of fruit always finds a buyer at the top prices.

A test made by the Ohio agricultural station in the feeding of hay and haddock corn, showed that about four pounds of ensilage equal one of hay in feeding value.

An Eastern orchardist says he made a Seckel tree bear by putting a liberal supply of wood ashes under it in the fall, manured it well in winter and drenched in June.

Don't neglect to set out some shade trees along the roads this spring. Some could be beautiful to a wonderful degree if sufficient attention were paid to tree planting.

Strawberries that have been thoroughly tested and gained commendations are Bulnah No. 5, Haverland, James Downing, Michel's Early, and King and Prince of Berles.

A grape-grower, at a recent meeting in Nebraska, recommended as the five varieties of grapes for the Nebraska the Worden Moore's Early, Concord, Perkins and Duchesne.

Some growers have reported excellent results from nitrate of soda on strawberry beds. About 200 pounds are used, and is applied by digging in with two or three parts of

Do not let your fruit trees overbear. Trees set last year should have but one or two specimens of fruit perfect themselves, and these more to prove the kind than for any other reason.

Eastern farmers each year increase their supply of chemical fertilizers. Some of them claim that "grass and chemicals make a better and cheaper dressing for their lands than stable manure."

The Texas Farmer and Ranch predicts a great increase in rice production in Texas, as a good start has already been made, and it is demonstrated that a great deal of the southeastern part of the State is adapted to its production.

Ground should be broken deep and well pulverized for all kinds of crops; but the cultivation should be shallow, so as not to tear out the roots of the growing crop. The object of cultivation is to keep the surface clean and loose.

If there is snow and ice mixed with manure in the barnyard, it will pay to fork it over and pile it up toward spring. That will set it fermenting, besides exposing the heap to the action of sun and air as warm weather comes on.

At the Vermont Station, where the hot-water treatment has been tested for smut in oats, it is claimed a second and important consideration in the possible gain, aside from the destruction of smut, of a decided increase in yield from treated seed.

Do not plant flower seed when the ground is wet. Make the surface as fine and smooth as possible, cover each kind of seed to the depth proportionate to its size, but never more than three or four times the diameter of the seed. Press the soil firmly over the seed.

The consolidation of returns of comparative crop to the Agricultural Department at Washington makes the following State percentages for cotton: Virginia, 55 per cent; North Carolina, 75; South Carolina, 75; Georgia, 74; Florida, 60; Alabama, 65; Mississippi, 60; Louisiana, 55; Texas, 84; Arkansas, 58; Tennessee, 63. General average, 69.2.

At the New York station, where many new varieties of strawberries have been tested, the twenty most productive sorts in the order named are: Boder Wood, Greenville, Burt's, Eucharis, New Dominion, Sor de Bossuet, Lyons Seedling, Farnsworth, Middlefield, Wayfield, Hurlbut, Hamedon, Eureka, Phillip, Seedling, Daisy, Haverland, Crescent, Gov. Hoard, Great Pacific and Viola.

No time now should be lost in securing grafts, especially of those kind of fruit that bud early. After the bud has started it is hard to make a graft live. This is mainly the reason why so much difficulty is found in grafting plums and cherries. Pack the grafts fast in the cellar, and it will be all the more sure. For if the grafting is delayed until the tree to be grafted is beginning to push its buds. The sap then is flowing freely and the union of new and old stalks is soon effected.

## Tobacco Culture in Georgia.

Tobacco culture is in its infancy in Georgia, and very few farmers have yet erected the necessary buildings for curing and housing the crop. It is believed that a very large portion of the State is well adapted to this crop. The Southern Cultivator says that in Middle and North Georgia there are good farming lands with a due proportion of soil adapted to the culture of "bright" tobacco.

## Soil Wasted by Winds.

Anyone who wants to note the losses of fine surface soil by winter winds can see it clearly in the covering of snow banks with more or less deep covering of earth, which makes them look like piles of mud. When the bank thaws away in the spring, this deposit of soil is washed into the grass, giving it a bright, green color insuring a rapid growth. With clover sometimes the deposit is so heavy that the plants are smothered and killed. It pays to erect artificial windbreaks to prevent most violent sweep of the winds, and, as a rule, keep the fields that are most exposed to sweeping gales seeded with grass or clover as much as possible, in order to save this. The waste is less on low lands, especially if sheltered by orchards or forests on the hillides to points whence winter winds usually come.—Am. Cultivator.

The Metropolitan League will meet in Louisville May 10, at 10 a. m., for a two days' session.

## Too Punctual.

The Hindu places a clock in his show-rooms, not because he does to know what the hour is, but because a clock is a foreign curiosity. Instead, therefore, of contenting himself with one good clock, he will perhaps have a dozen in one room. They are signs of his wealth, but they do not add to his comfort, for he is so indifferent to time that he measures it by the number of bamboo-lengths the sun has travelled above the horizon. In the country police stations, where the European division of the hours is observed, time is measured by placing in a tub of water a copper pot, in which a small hole has been bored. It is supposed that it will take one hour for the water to leak into the pot, so as to fill it and sink it.

When the policeman sees that the pot has disappeared, he strikes the hour on a bell-like gong. If he is smoking or dozing, the copper-pot may have disappeared several minutes before he discovers the fact, but the hour is when he strikes the gong.

A writer in the "Temple Bar" tells an amusing story to illustrate the Hindu's indifference in this regard. When the railway was first opened in a new part of India, it took a long time and many bitter experiences to convince the natives that a train always starts on time. Shortly after the opening of the new line, a deputy commissioner sent his native servant with his letter-bag to put on board the mail car. Presently the man returned with the bag, having missed the train. "You had but a half a mile to go, and you knew that the train left the station at 3 o'clock," said the angry commissioner. "Yes, truly," answered the native, in an aggrieved tone; "but ah, when it strikes three here the train goes from there!" Such sharp practice the native had never known before, and he did not think it creditable to the company.—Manchester Times.

## Feeders of Crime.

Among the many tendencies that our age is developing none are more deplorable or alarming than familiarity with crime in all its protean forms. Schoolboys and schoolgirls keep themselves well informed in all the details of the latest murder or whatever else the crime may be. The question is asked, What shall be done to restrain this great and growing evil? Two reforms are suggested. To illustrate one, a criminal court scene is presented, where are Judge and jury, attorneys and prisoners, and perhaps his family. But these are not all. Outside the rail, and perhaps inside of it, is a large audience of more or less interested by idle curiosity. A part of these are sometimes children, all drinking in with great eagerness an exhaustive river of contamination. Such tribunals should be closed to the public. The report of criminal proceedings in the secular press constitutes an even more effective education in crime than does the criminal tribunal itself. The number of persons who can crowd into a court-room has limitations. In the columns of the press the embryonic criminal finds a competent instructor, of whom he is an apt pupil. He instantly notes weak points and errors which he will avoid. When his time comes he is fully equipped and fully able to elude justice. The press has been inhibited by law from publishing details of executions, and the report of criminal court proceedings might also be inhibited.—Green Bag.

## Electricity in Kitchen Work.

The use of electricity in the kitchen for cooking purposes will be a godsend to housekeepers and their help if the electric fluid can really be made to render as good and sure service there as is rendered by coal, wood or gas. It is already used successfully and satisfactorily in some establishments, both in Boston and elsewhere, and Edison is not the only person who can tell of its serviceability as a broiler, roaster, boiler and baker. Cheap, of course; why not? The use of electricity in the kitchen may be disadvantageous to the coal-cart drivers, the coal miners, coal dealers, coal trusts, coal lords and gas companies; but we can't help that. These people must be willing to suffer their share of the disadvantages of progress, invention and science. The electricians are bound to prosper. We cannot surely run short of electricity.—Chas. A. Dana in N. Y. Sun.

Notwithstanding the efforts to square Sam Clay's \$7165 steel from the Shannon boys, of New York, an officer has left Knoxville, Tenn., with Clay, bound for New York.

The Highest place, among all blood-purifiers, belongs to Dr. Pierce's Golden Medical Discovery. See if you don't think so when you consider how it's sold to you. It's guaranteed—and no other medicine of the kind is. It's never fails to benefit or cure, you have your money back. Every medicine makes the same boast, but it can do so much more. But the "Discovery" acts differently, just as it's sold differently. It's not like the average pills, which claim to do good in March, April, and May. All the year round, with equal benefit, it cleanses, purifies and invigorates the whole system. All blood, skin, mucous secretions, from a common scurf or eruption to the most serious eruptions, are cured by it. For Salt-rheum, Tetter, Eczema, Erysipelas, Boils, Carbuncles, Sores, Ulcers, or Thick Noses, and Enlarged Glands, Tumors, and Swellings, it's a remedy that nothing can equal.

## Chickens on the Farm.

A generation ago the chickens to be seen around the average farm-house were of a mixed and haphazard breed. There are farmers still who keep such poultry; there are also farmers who do not believe that the world is round and revolves on its axis every twenty-four hours. But farmers so careless as to their poultry are almost as scarce as the latter ignorant class. You may meet a farmer whose ideas are a little mixed about the rotation of crops and the value ofilage, but you have to go far indeed to find one who has not his preference as between Plymouth Rocks, Leghorns, Langshans, Cochins, and Brahmas. Chickens on a farm are a kind of savings-bank, and those which lay the most eggs and fetch the highest prices are the most desirable. They are very naturally more highly esteemed. Now the fancy farmers were the first to attempt to breed better chickens in this country, and they continue to lead in the experiments looking towards the betterment of domestic fowls. There is one thing that has been insisted on in vain, so far as ordinary farmers are concerned. That is the value of cleanliness—cleanliness in the chicken houses and cleanliness in the food and water given to the fowls. Unclean houses are productive of all kinds of disease, and unclean food and water also. There is an old-fashioned notion that chickens are good scavengers, and that if allowed the freedom of the barn-yard they will forage for themselves. This is true, but it is very unlikely that any cock or hen from such a range would ever take a poultry show. The way to get prize chickens is to mate the best with the best, and rear the broods with care. As the reward, both in profit and satisfaction, is well worth the trouble, it seems strange that any country people should be content with any but the best.—Harper's Weekly.

## Johnny Davenport's Help to Democracy.

Johnny Davenport's bill against the United States Treasury for interfering with the election of 1892 footed up \$60,000. And he cost the Republican party in this State more votes than he cost the United States Treasury dollars.—New York Sun.

## Natural Foe of Anarchy.

Give a man his own house, his own little grassplot and doortop, his own bathtub and other home comforts, and he is not likely to become a rioter or an anarchist. The best that can be said of any city is that the majority of its citizens live peacefully and comfortably in homes of their own. This distinction is claimed by the city of William Penn and Benjamin Franklin.—Minneapolis Tribune.

## Republicans Responsible for All.

The Republican press is taking great pleasure in the report that the appropriations of the last Congress amount to more than a billion of dollars. Possible they do, but a large part of them were the direct result of the Republican legislation of 1890 and 1891, and all of them were adopted by a Republican Senate and signed by a Republican President.—Indianapolis Sentinel.

Buy Landreth's garden seeds of all kinds, and onion sets at the lowest prices at—

## What is CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrup, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays Feverishness. Castoria prevents vomiting Sour Curls, Green Diarrhoea, and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

**Castoria**  
"Castoria is an excellent medicine for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other harmful agents down their throats, thereby sending them to premature graves."  
Dr. J. F. KENNEL, Quincy, Ark.

**Castoria**  
"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."  
H. A. ANDER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."  
UNITED HOSPITAL AND DISPENSARY, Boston, Mass.

ALLEN C. SMITH, Phys.,  
The Centaur Company, 71 Murray Street, New York City.

# THE ADVOCATE.

Y. M. C. A. COLUMN.

Persons perusing this column will learn what the Association is doing at home and abroad.

International Conference of Secretaries of the Y. M. C. A. meets in Louisville, Ky., May 5 to 9.

The Biennial International Convention of the Associations of North America will deliberate in Indianapolis, Ind., May 10-14.

A philanthropic friend of the young men of Antioch, Turkey, has presented the Association there with a new building. The organization has a membership of 120, and a flourishing boy's department with 150 members.

The Association of New Orleans celebrated its fortieth anniversary Feb. 7. It has a membership of 355, and last year spent \$4,086 in its work. A movement has been started for erecting a new building.

The conference of Young Men's Christian Associations, at Saratoga, N. Y., appropriated \$12,000 for State work during the year. About 500 were present.

Read below what Rev. W. T. Bolling, Winchester, Ky., says of Kentucky State Convention:

"The Twelfth State Convention of Kentucky held its services in Winchester, February 23-26, and proved to be a most pleasant and profitable convocation, both to the members of the convention and the people of Winchester."

The coming together of two hundred and twenty-eight Christian young men with the zeal of youth added to the love for the Master and men, which seemed to actuate them, formed a pleasing picture, making one hope that there was more good in and hope for the land of the blue grass than some other things would indicate.

Dr. J. W. Buckley, of Lexington, was elected President, and made an admirable presiding officer, sustained and assisted by the General Secretary, Rosecrans.

There was quite a number of visitors from other States, and their spirit indicated the same intense zeal for the work, as that displayed by the Kentuckians.

One could not fail to be impressed with the great ruling desire evinced by them to save souls; and while the separate processes to develop the physical, mental and spiritual in man were fully considered, still in every address or prayer, the leading thought was to make all work to the saving of souls; and those who advocated this were not doing so from the standpoint of theory but of personal experience. I have never looked upon a finer, clearer-eyed, clean and more cultured body of men, and could but rejoice at seeing so much of consecrated young manhood.

Personal inquiry developed the fact that the Presbyterian church was most largely represented, and while I regretted that Methodism did not hold the first place, I am glad that our brethren were so ardent and earnest in the work of the great organization. In all the Bible readings, addresses and prayers one could not trace the faint of denominationalism, and the diversity was lost in the unity of expression and effort to save the souls of young men.

The colleges furnished the larger number of the delegates, and this fact impressed me as a most hopeful sign of future good in consecrated intelligence, and the colleges of Danville and Richmond, representing Presbyterianism, accounted for the greater number of young men of that church present, and at the same time furnished an object lesson on the subject of education which we Methodists in Kentucky could study with profit.

I was painfully impressed by the report made that of the 300,000 young men in Kentucky, about 225,000 of them were wanting in the knowledge of a personal Savior, and surely the fact once fully realized should arouse the slumbering churches to the wonderful privilege and fearful responsibility which they must face and meet.

What a waste of youth in these figures, and what a field of waving grain is before the churches, if they would but put in their sickles and reap for God. What an account will God demand at our hands! May the Holy Spirit send the breath of life among the dry bones that they may live, and our young manhood be saved from eternal death unto God and life eternal.

I think an honest confession is just here in order. I have found room for criticism of the Young Men's Christian Association at times, but am convinced that less of this and more of the zeal for souls evinced by these young men, would have been better for me, and the souls of men, and I would advise any brother who is inclined to criticize any particular feature of the Young Men's Christian Association work, to attend one of their conventions and be cured of his error.

The delegates seemed to enjoy their stay with us, and our people certainly enjoyed it, and all feel doubly repaid for all the labor expended in entertaining them, and would be glad to have them come again.

On Sunday all the churches save the Episcopal and Catholic were occupied by their speakers, and to them large and interested congregations listened.

The place of the next convention was not made known, but was left to the Executive Committee to decide, and I cannot but wish that it may be as pleasant and profitable to all concerned as this one has been.

May God speed the work of these Christian young men, and give them many souls before the next Convention assemblies.

The Chicago switchmen will not go out on a strike, they having returned an answer to the General managers. The switchmen were somewhat astonished by the array of public sentiment against any strike at this time, almost every paper in the city having declared that the attempt saved too much of an attempt at extortion because of the immense amount of traffic incident to the World's Fair.

The great ice gorge behind the dam at Edinville, New York broke Monday afternoon. The immense body of water behind it rushed down the gorge, carrying thousands of tons of ice with it. This struck the Cornell dam, which winters there, and swept almost every steamboat and ferry boat into the river. Besides about 25 steamboats, 30 Northern canal boats loaded with ice and 25 Delaware and Hudson boats were swept away. Loss likely \$250,000.

A war has been brewing for some time at Memphis, Tenn., between the railroads using the bridge over the Mississippi River and the Memphis Bridge Company about the tolls on freight cars and locomotives. The fight reached a climax last Monday. The St. Louis & Iron Mountain finally refused to submit the charge of \$4 a car, and notified the bridge company it meant once off its high horse under penalty of its losing the patronage of the Gould roads. Steps were at once taken by the Iron Mountain to again place the transfer boats into commission.

Princess Kaiulani called at the White House last Monday afternoon. It was a purely unofficial visit and it had been stipulated beforehand that not a word should be uttered on politics or upon any subject even remotely touching the present or future status of the Sandwich Islands. This was necessary because of the fact that the Princess and her party have no official standing whatever in this country. Kaiulani expressed herself as charmed with the President's wife. Mrs. Cleveland was much interested in hearing the Princess tell of her impressions and experiences in the United States.

Wanted November's Hint Enough R. C. Kerens, member of the Republican National Committee from Missouri, gives the committee some thoroughly good advice when he says that its members should find out at once the condition of affairs, and at the state of feeling in the party throughout the country.

The aggregate of tree gold now in the Treasury is a little more than \$50,000,000. Special offers, aggregating \$300,000, was received Tuesday from Western points. Secretary Carlisle is accepting these offers as fast as he can supply small Treasury notes for them. Only the more advantageous are now accepted.

There is much plantain seed sold for clover seed. It is easy to note the difference when a microscope is used. A common exercise spectacle will make the true and false seed plain, and only pure seed should be used. If it is hard to obtain pure seed get the best you can, cut out weeds as they appear, and thereafter sow seed only from that produced on your own farm.

Rear Admiral Harmony is to be retired from the navy at his own request.

Electric Bitters.

This remedy is becoming so well known and so popular as to need no special mention. All who have used Electric Bitters sing the same song of praise.—A purgative medicine does not exist and it is guaranteed to do all that is claimed. Electric Bitters will cure all diseases of the liver and kidneys, will remove pimples, boils, salt rheum and other affections caused by impure blood.—Will drive malarial fever.—For cure of headache, constipation and indigestion try Electric Bitters—entire satisfaction guaranteed or money refunded. Price 50 cents and \$1.00 per bottle at W. S. Lloyd's drugstore.

Look at the size of the ordinary pill. Think of all the trouble and disturbance that it causes you. Would it you welcome something easier to take and easier in its ways, it at the same time it did you more good? That is the case with Dr. Pierce's Pleasant Pellets. They're the smallest in size, the mildest in action, but the most thorough and far-reaching in results. They follow nature's methods, and they give help that lasts. Constipation, indigestion, bilious attacks, sick and bilious headaches, and all derangements of the liver, stomach and bowels, are promptly relieved and permanently cured.

"If we can't cure your Catarrh, no matter how bad your case or how long standing, we'll pay you \$500 in cash." That is what is promised by the proprietors of Dr. Sage's Catarrh Remedy. Doesn't it prove better than any words could, that this is a remedy that cures Catarrh? Costs only 50 cents.

Bucklen's Arnica Ointment.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay returned. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by W. S. Lloyd.

FOR STATE SENATOR.  
We are authorized to announce Hon. J. E. Gay, of Clark county, as a candidate for Senator of this district composed of the counties of Clark, Bourbon and Montgomery, subject to the action of the Democratic party.

Col. J. H. Holloway, of Clark county, is a candidate for State Senator from the district composed of Bourbon, Clark and Montgomery counties, subject to the action of the Democratic party. Your vote and influence are respectfully solicited.

John S. Clarkson, President of the Republican National League has issued a ringing call for a convention of the League at Louisville, on May 10. The flaming call is decidedly lurid and the "bloody shirt" that has done one such signal service in the day one by is flung to the breeze and it is shaken out with no gentle hand.

The fight must go on. The cause of human liberty must not be considered, at the end of one, or even three hundred defeats.

"It must go on until the weak and Atrophied of all classes and conditions are protected under the laws and until the day shall come demanded by as rant: When the rights of a Republic can shall be as fully admitted and a duty protected at every voting place and as the rights of a Democracy."

The talk is wonderfully loud about this new day of complete Democracy, Tuesday in the nation, and the restoration of sectional rule in the Government.

The fact is, the appeal sounds not like Milton's version of Satan's call, but the fallen angels as they lay beaten and broken after their memorable feat. It would be just as well for every Democrat to keep an eye on this thine Republican party, for notwithstanding their crushing defeat in 1892, they may succeed in raising hell in 1896.

The Democrats of Mt. Sterling were unsatisfied only when the present master has been removed and one of the several applicants has been put in charge to the victors belong the bells.

Our master, John C. Wood, has had the distinction of having the most unadvised of his last year and the most malignant of his last year, among his party could frame a right to the notice of President Cleveland. We have a straight tip it will be but a few days till it will be done, Johnnie, pack your cologne.

**Card of Thanks.**  
I desire to extend my grateful acknowledgements to the friends and neighbors who so unselfishly worked away my property, and that of my son, Mrs. Parnella Fisher, during the last Monday, that destroyed our houses.  
JAMES TURLEY.  
Daughters College, the famous local institution conducted nearly 40 years under the auspices of President Augustus Williams, at Harrodsburg, was sold by Colonel P. B. Macdonough, Special Commissioner, in execution, to satisfy mortgages attachments to the amount of \$100,000. The large brick edifice and outbuildings were valued by the appraisers at \$19,000.  
Those wanting to see new and things should attend our open next week.

## AN NOBLE PICTURE.

T. C. Lindsay's Canvas of the Piedmont Valley.

Painted for the Columbian Exposition Under Commission from the C. & O.

The Chesapeake and Ohio, the wonderful scenic route which runs "to the river, through the mountains to the sea," is to be represented at the World's Columbian Exposition by a noble canvas.

It is from the brush of T. C. Lindsay and in its subject as well as in its treatment it is a notable work. It is in three panels, aggregating sixteen feet in length by six in height. The central picture is the Piedmont Valley as seen by the traveler on the C. & O. as he emerges from the east end of the tunnel through the Blue Ridge, which is at Afton a pretty watering place to the right, at this supreme moment a mountain travel, the wonderful valley, which has all the characteristics of, called for its sister, the historical Valley of the Shenandoah, lies in all its sublimity.

The artist has chosen a clear day and far away, to what seems under its magic brush, miles and hundreds of miles of distance, roll hill upon hill and mountain upon mountain, while he has obtained a "height" for the "mackerel" sky which is very effective in emphasizing the depth of the valley. In the foreground the detail is pains taking and realistic, and one feels that one could almost step upon the mountain brow, along whose ridges, levelled by engineering skill, is rushing the "Fast Flying Virginian." This central picture, which is the glory of the whole canvas, is nine feet long, and it gives to the beholder an impression of a much vaster work. The left panel is a view of the New River Gorge, and there is a calm and refreshing, yet rugged beauty of landscape, an abundance of autumn that has in very telling contrast with the bold mountain view to its right leaving this valley, with the eyes, as speak, and crossing the Piedmont Valley, one takes a mental journey through the Virginias and arrives at a sea, the left panel of a stretch of gray beach at Old Point Comfort.

This realistic picture of the Fort Monroe light-house and the outline of that famous fortification as a back ground, with the sails of a yacht or two beating up to the Hygeia against an adverse wind. In these three panels the versatility of the artist, who loves his work so well and laboriously hard upon it that nothing seems possible to him, is shown, and would themselves speak the vast resources, did not one also know that neither the daintiness of water-color the delicacy of the flower, the strength or detail of the lion or the dog can baffle him.

General Passenger Agent H. W. Fuller and Assistant General Passenger Agent C. B. Ryan, who supervised the work here, chose well when they selected Mr. Lindsay to tell at the great Exposition, in a way that even "who runs may read" of that wonderful journey by the river, over the valleys, over the mountains and to the sea.

The great picture has been framed, and is temporarily on exhibition at the Cincinnati Passenger Office of the Walmar, where Mr. Lindsay's friends and the friends of art should see it. Cincinnati Commercial-Gazette, February 12, 1893.

While writing with all the scientific knowledge of a great astronomer, Camille Flammarion in his marvelous story "Oméga: The End of the World," which begins in the April number of The Cosmopolitan magazine, keeps the reader at the highest point of excitement by his vivid description of the alarm and despair excited by the approach of a comet whose collision with the earth had been declared by astronomers inevitable. The description begins at the time when the business of the world has been suspended, and a great mass-meeting held in the Institute of France, we hear the discussion of scientists as to the possibility of a sound duologue, the drying up of all the globe, or the total destruction of human life by cold, together with the possible phases of death paralleled by the history of the moon. For scientific statement and sensational effect this characteristic production of French genius is unique, and the reader who reads this marvelous story—and it begins it will be certainly flushed with awe assimilated without effort, a compact store of scientific knowledge. In this way, apart from its absorbing interest, this remarkable piece of fiction will have a distinct scientific value.

## DEATH.

Another of Montgomery's Best Citizens Goes

To That Home From Which No Traveler Returneth.

Mr. John A. Thomson was a prominent citizen of this county. His friends were numberless, and if he ever had an enemy, his every-day speech never indicated it. He was a friend whose counsel was wise and character enviable, and hence the shock which came with the announcement of his death, which occurred on last Saturday morning at ten o'clock, at his late home near this city. Mr. Thomson had been in bar health since January last, and on this account his son Robert, who is a student for the military, had been called home. When, how and where death shall come is a problem beyond the solution of man. The wise are prepared for the hour. Mr. John A. Thompson, an honest man, a true friend, a devoted husband and father, sleeps the sleep of death. His dear family are not alone in their grief. May they have divine grace sufficient that they may bear this heavy load. His funeral was preached Monday afternoon at the family residence by a life long friend, Rev. William Ruppert, of Clark county, a good man, tender in sympathy, assisted by Rev. E. E. Bomar and the body was placed in the family burying ground beside those of the loved one who has preceded him.

# THE ADVOCATE.

The city school election was held in Keokuk, Iowa, Tuesday. Never before was there ever such interest taken. Two thousands eight hundred and twenty-four votes were cast, more than were ever cast at a Presidential election, and about 2500 more than ordinary at the school elections. The American Protective Association ran candidates for trustees against the Catholic nominees. The A. P. A. had a great majority.

One of the richest strikes ever made in the famous mining camp of Crede, Col., was struck in the Chicago & Crede Consolidated Mining and Milling Company's property Monday. The mineral was encountered in the breast of the 275-foot tunnel in the Silurian belt. The assays show 700 ounces of silver to the ton.

The residents of Jamaica, L. I., were startled at about 3:10 Tuesday afternoon, by a rumbling sound. This was followed by a shaking of houses, crockery and windows. Many believe the phenomena to have been caused by an earthquake. The Jamaica Town Hall, a large brick and stone building, was shaken and the window rattled about. People at Scully's Hotel received a severe shock. At the Long Island Railroad Depot windows and doors rattled for some seconds.

When asked if everything would be in readiness by May 1, for the opening of World's Fair, Director General Davis said: "Over 100,000 packages have already been received here. Most of these are foreign, but when the domestic displays begin to come they will come in a hurry. The capacity of the installation plan has not been tried in the least. We are ready for the exhibits to get here, and the faster the better. It a big force of men and continuous work can put in shape the show will be ready by May 1."

A new regulation has been issued by the Civil Service Commission regulating applications for positions in the departmental service. It provides that no application for an examination shall be accepted where the appointment would be charged to the appropriation of a State unless it shall be shown to the Commission that the applicant is at the time, and has been for the six months next preceding, actually living and residing and having his or her place of abode in the State, or that he or she is employed in the public service of said State or United States, or that the applicant pays poll tax or is a voter in said State, or is the wife or minor child of a person who is then in the public service of the said State or of the United States, or pays poll tax as aforesaid.

The Postmaster General has notified Senators and Representatives that their recommendations will not be sufficient to secure the appointment of postmasters, as he will require in addition some expression from patrons of offices in regard to the fitness of applicants.

The New York Central and Hudson River Railroad Company has decided to increase its capital stock to an even \$100,000,000. The present outstanding capital is \$89,428,000. The increase is to be offered to stockholders of record on June 15, 1893, at par.

Richard Croker, the Tammany chieftain, has purchased a half-interest in the thoroughbred stock of the noted Belle Meade Stud. The price given out is \$250,000, but this is probably more than was really paid, as Mr. Croker did not buy any interest in the farm, which embraces over 4,000 acres.

A special from Atlanta, Ga., to the Courier Journal states that yesterday was the annual pay day of the Confederate pensioners. There are 3,300 names on the roll, and \$100,000 was paid out. A bill passed by the Legislature provides for the widows of veterans, and will run the annual pension appropriation up to \$600,000. The pension roll, whether State or national, seems to gather volume as the deaths of the veterans increase.—Courier Journal.

Secretary Carlisle is reported to be preparing a financial plan to submit to Congress at the next session that would involve a complete reorganization of the financial system. One feature of the plan is said to be the issue of currency under State charters beneath the general supervision of the Federal Government.

## Blasts From the Ram's Horn.

No man is fit for heaven as long as he wants anybody else kept out.

Some shepherds pay the most attention to the fattest sheep.

The world gives nothing in the way of treasure without sending trouble therewith.

Some of the people who are the most anxious about whether we shall know one another in heaven pass each other on the street without speaking.

Some birds are so taken up with their bright plumage as to forget that they have very black feet.

People who wear loud clothes are doing their best to make up for some conscious lack.

The paths of glory lead but to the grave. Very true, master poet, but do paths of ignominy lead anywhere else?

The man who is too poor to take a newspaper always has a dog.

Knowledge is power, but it takes a good deal of it to know how to live without work.

Self-conceit is harder to cure than cancer.

Christ never sent anyone to anybody else who came to him for any kind of help.

It is hard for the shepherd to fatten the sheep that prefer to live on husks.

## A Way Out.

Jack.—"Say, Bill, we've been in hard luck lately, ain't we?"

Bill.—"We have, old man."

Jack.—"I'll tell you what we'll do. You insure your life in my favor for \$10,000, and I'll do the same by you."

Bill.—"Well, what good'll that do to us?"

Jack.—"Why, we'll just load up our guns, and step off thirty paces somewhere and see who gets the money."

—Life.

## Psychological impulses.

Cholly.—"Do you ever have moments when you feel like doing something absurd?"

Myrtle.—"Yes, indeed. Why, when you proposed to me last I felt for a moment like accepting."—N. Y. Herald.

## Rhode Island's Abandoned Farms.

According to a report from the Commissioner of Industrial Statistics for Rhode Island there are in that State 277 abandoned farms. Upon the majority of these, it is said, even the grass is not cut. In the localities of these deserted farms it appears that there is a regular drain upon them for mill help, which has been in good demand; that many of the farms are removed from railroads and good markets.

## Horse Breeding.

Horse-breeding is one of the important industries of the country, and of recent years there has been a noticeable increase in the number of well-bred horses. The competition of the West is not felt in the Atlantic States in horse-breeding as in cattle-growing. A fair idea of the relative importance of this industry in the varying sections is given in the reports of the several State agents to the Department at Washington.

It is claimed by the New York State agent that in New York the soil, grass and water produce horses of stronger bone, sounder feet and harder muscles than the alkaline soil on which so many Western horses are reared, and that attention is given to the breeding of a finer class of horses for road and carriage purposes. This claim, however, is not admitted by those interested in horse-breeding in the West. Improvement in number and quality of horses is reported in Virginia. The introduction of Hambletonian and other strains of thoroughbred blood has been of great advantage in North Carolina. In the east of Texas, the rule has been to purchase from Tennessee or Kentucky in preference to raising horses, but there are signs of some change in this respect.

A tendency is noted in Texas to improvement through better breeds. Kentucky shows no tendency to reduction of numbers though prices are not satisfactory. Through the Ohio Valley there is little change in number of horses. Horse-raising in Iowa is less absorbing as a rural enterprise than it has been except as to trotting stock. There is a ready sale for well-bred horses in Missouri at a good price, and improvement in quality. In Kansas the supply is greater than the demand except for desirable draught horses. A strong tendency to increase the stock of horses is apparent on the Pacific coast and especially in California.—N. Y. World.

## HORSE AND TRACK.

From From has \$46,000 worth of stake engagements.

Among the lucky guessers to Sidney's price, three were ladies.

Electioneer's fast son, Truman, four years old record, 2:12, will not be brought east this season.

Naney Hanks trotted thirteen miles last year, the average of which was 2:08.

The Minnesota Senate has passed a bill making the docking of a horse's tail a criminal offense.

W. C. France states that the net profits of Highland Farm from 1887 to 1893 were \$203,000.

It is estimated that over 100,000 trotting horses are trained in this country annually.

Fred S. Wilkes, 2:11, will probably be in Scott McCoy's stable this year.

Monbars, 2:11, will go back into George Starr's stable after a season in the stud.—Horse World.

The Ketcham-Span party sold the stallions Brown, Gotham and Sir Gothard to the Austrian government and will sail for America March 25.—American Sportsman.

The Austrian government extends a cordial greeting to the American trotter and expects to 20 guineas (\$8) per head as duty on such horses coming into that country.

A good many people fail to use judgment in entering their horses. They enter a second-class horse at a first-class meeting and fail to get the money, when their would have been a money winner at a smaller meeting.

Governor Flower has signed the Speedway bill, and New York road riders will soon be able to enjoy a fast ride. The drive will be on the west bank of the Harlem, starting at One Hundred and Fifty-fifth street and following the river for about two miles and a half. The estimated cost is \$1,500,000.

Marvin is driven on the covered track at Meadville a ten-month-old filly by the Electioneer stallion, Conductor, dam by Wood's Hambletonian and has already stepped the youngster a quarter in 44 seconds. This is certainly phenomenal, and Marvin says that he expects to lower the yearling record with this daughter of Conductor.

An eastern breeder who consigned stock to a combination sale at Kentucky recently has sized up the situation correctly. After arriving at the sale mart with his stock, and observing the prices at which stock was selling he withdrew his consignment from the sale and bought about two carloads more and shipped them home. He says that now is the time to buy, not to sell.

Some idea of the faultless disposition of Roy Wilkes, 2:07, and the evenness of his temper may be gathered from the fact that when he was recently posted, in harness, for his portrait, although he had no previously been out of the barn for five weeks and was full of animation, he stood like a lamb with no other restraint than the gentle hand of his owner's five-year-old daughter.

George Winn, a worthless negro of Fayette Mo. convicted of vagrancy, was sold for a period of six months to the highest bidder. This proceeding was in accordance with the vagrant law of that State. R. S. McCampbell, of Glenn Springs, bought the negro for the sum of \$20.

# PUBLIC SALE OF TROTTING STOCK.

ON TUESDAY, MAY 16, 1893, at A. T. Thompson's stable in Mt. Sterling, Ky., I will sell to the highest bidder, Forty or Fifty Trotting-bred Mares, Fillies, Colts and Geldings. Catalogues will be out by April 25th.

TERMS—Credit of four months, with 6 per cent interest, or 4 per cent discount to those who desire to pay cash.

JOHN W. WHITE,

CAPT. JACK STEWART, Auctioneer.

## LAND, STOCK AND CROP.

Monday was one of the largest court day Lexington has seen for many years. Butchers' cattle were brisk at 4 cents, and hogs were down to 7 cents. Plenty of mules and plow horses on the market and the auctioneers struggled hard to effect sales. Shopping and buying were active.—Gazette.

The money value of the live stock handled at Chicago during 1892 reached \$255,000,000, exceeding by \$14,000,000 the valuation of any preceding year.

A doctor in Kansas has produced a plant called the "potomato," which is a cross between a potato and tomato, and will yield both fruits, so we are told.

Mr. J. B. Rodes, of Burgin, sold last week to Mr. George Cogar, 40,000 lbs. of old hemp and 25,000 lbs. of new hemp at \$4.75 on the farm. . . W. S. McElroy, of near White Sulphur, sold his crop of tobacco of about 4,000 lbs. to Walker & Co., Georgetown, at 12 cents for three grades and 5 cents for the trash.—Midway Clipper.

Capt. L. C. Kash of White Hall, Madison county passed through here Monday, to Hazel Green to bring back 50 hogs he has bought there. Average over 100 lbs. at 4 1/2 cents. The hogs are to go to Madison.

William Bros. are prepared to do all kinds of the work. They guarantee all work contracted for by them.

Louisville Tobacco Market.

Furnished by Glover & Durrett—Louisville Tobacco Warehouse.

Sales on our market for the week just closed amount to 3,728 hhds., with receipts for the same period of 2,310 hhds. Sales on our market since January 1st, amount to 41,340 hhds. Sales of the crop of 1892 on our market to this date amount to 47,372 hhds.

There is not much change in the condition of our market this week on New Burley tobacco. The market remains steady at the improvement which was reported last week. Receipts of the week were somewhat smaller than they have been for some weeks past. The following quotations fairly represent our market for Burley tobacco, 1892 crop:

Trash, dark or damaged tobacco, \$3.50 to 5.00.

Common colony trash, \$5.50 to 7.50.

Medium to good colony trash, \$7.50 to 9.00.

Common lugs not colony, \$5.00 to 7.00.

Common colony lugs, \$8.00 to 9.50.

Medium to good colony lugs, \$9.50 to \$11.00.

Common to medium leaf, \$8.50 to 13.50.

Medium to good leaf, \$13.00 to 15.00.

Good to fine leaf, \$15.00 to 20.00.

Select or wrappry tobacco, \$20.00 to 24.00.

## Trotting Stock —AT— Public Sale.

ADMINISTRATOR of the estate of J. D. Lockhart, deceased, late of Montgomery Co. Ky., at public auction at Thompson's stable, Mt. Sterling, at 5 o'clock, April 15, 1893, will sell

## 15 Head of Trotting Stock

belonging to said estate. Among the number are Kentucky Bred 1890 by Bayon Wilkes 2:18, dam Asterity by Harlan; Bell Peters, 2:28; Almont West, a fast three-year-old stallion; a very fast daughter of Country Baron; a full sister to Asterity, 2:17, and other good ones. Also, at same time and place, I will sell 29 shares of the R. & L. Land Co. stock, and 4250 of stock in the Middleboro Security Land and Investment Co.

G. T. FOX, Administrator, Mt. Sterling, Ky.

Avery steel plows, Stoddard's New Climax and Triple Disc Harrows have been sold in the county for 20 years. Evans and Farmers' Friend two horse Corn Planters; Evans Triple Drag Harrows. The justly celebrated Mitchell Wagon. Ask for the New Superior Cook Stove.

SOUTH MAYSVILLE ST.

## THE NEW YORK

## PAWN BROKER'S STORE

Has \$6,000 worth of CLOTHING, BOOTS, SHOES, HATS, CAPS and

## Gent's Furnishing Goods

That must go regardless of cost. Suits worth \$15 for \$3.50 and \$4. If you do not believe what we say, come and we will convince you. I will sell you goods at 50 cents on the dollar. This hardly looks reasonable, but I have just returned from New York, where I purchased these goods for cash, at rock bottom figures.

## JACOB GORDON,

24 South Maysville Street, Opposite New Opera House.

## W. A. SUTTON.

## DICK SMITH.

## SUTTON & SMITH.

West Main Street.

## FURNITURE and UNDERTAKING

We are in the  
Business for profit. We can succeed only by practicing strict economy and observing business methods. Our prices will be no higher than those of our sharpest competitors. We will be a duplicate in material and price to those in the closest markets, the same terms considered. The trade will be supplied with the latest styles of bedroom, parlor and hall furniture, wardrobes, bookcases, sideboards, chiffoniers, hat trunks, settees, plain and ornamental chairs, tables, couches, folding beds, in their various combinations, etc.

In addition to the above line, we will handle a full

## STOCK OF CARPETS.

Of both high and low grade, upholstery and curtain materials, mats, rugs, table and piano covers, window poles, etc.

## SUTTON & SMITH.

West Main Street.

## The Boston Tailor.

Will open up with new goods in

## Merchant Tailoring,

and Gent's Furnishings in the A. J. Wyatt Building, Main Street, March 18. Wait and see goods and get

Respectfully,

## S. GOLDBERG

The contract for the work on Richmond's \$100,000 Government building has been awarded to a Washington City contractor. Work will begin as soon as the Senate acts on the bill authorizing United States Court to be held at Richmond.

Mrs. Naomi Bush Gess has brought suit for \$5,000 damages against the Lexington Bell Electric line for carelessly running into and demolishing her carriage on December 31, 1892, which accident resulted in her personal injury.

## BEAN BROS.

Return privilege next season free if mare does not prove in foal. Mares kept at \$1 per week. Will not be responsible for accidents or escapes. All bills must be paid before removal of mare.

Second to Black Bess in 2:21 1/2 in 2:28 class at Mt. Sterling Fair in Oct. 1892. Sired by ABERDEEN.

Sire of Kentucky Union (3) 2:13 1/2, Alabaster (4) 2:15, etc.

1 dam OPHIR, (sire of Kentucky Union (3) 2:13 1/2, Alabaster (4) 2:15, etc.)

2 dam QUEEN DIDO, (sire of Kentucky Union (3) 2:13 1/2, Alabaster (4) 2:15, etc.)

3 dam, (sire of Kentucky Union (3) 2:13 1/2, Alabaster (4) 2:15, etc.)

4 dam Robert Patterson mare.

KNIGHTHOOD is a race horse, and his colts are good lookers and speedy with heavy muscles and tails. We believe he will easily beat 2:20 this season, and any one breeding to him can give note for twice the service fee, payable when his trotting to 2:20 or better if they so desire. Limited to twenty-five mares. Season closes June 10, when he goes in training.

## MAPLE HILL FARM.

## KNIGHTHOOD 4:186.
